Subject

Designing EISAC- a European Infrastructures Simulation and Analysis Centre
First DIESIS workshop

Dear Sir/Madam,

On behalf of the EU DIESIS project (<http://www.diesis-project.eu/>) I am sending you this letter because you either have responded to our earlier questionnaires where you showed your interest or you have shown your interest in another way.

The DIESIS project aims to design and prototype EISAC - a European Infrastructures Simulation and Analysis Centre enabling a European federated simulation network infrastructure for Critical Infrastructures (CI). The project is performed under the ESFRI framework (European Strategy Forum on Research Infrastructures).

Our questionnaire addressed various European communities and organisations which may have or foresee CI decision-support requirements, CI simulation requirements, CI models, or may have resources that can innovatively be used in such an infrastructure.

You are/your organisation is cordially invited to take part in **the first DIESIS workshop on July 1st 2008 in Brussels on:**

“Designing EISAC- a European Infrastructures Simulation and Analysis Centre”

(Note: the earlier communicated workshop date had to be changed for logistical reasons).

This workshop is the first in a series of workshops on the subject and will discuss and refine the collected and processed DIESIS requirements. Your medium and long term national, sector and business requirements should be best protected through your input and priorities during this workshop.

Needless to say that attending the workshop is free of charge and includes the catering during the day.

Date

May 28th, 2008
